I. GENERAL INTRODUCTION

GENERAL INTRODUCTION

Apollo Technologies Joint Stock Company was established with the vision of becoming a pioneer in the field of Technology and Engineering, contributing to the digital transformation in Vietnam and expanding globally.

With a quality management system certified to ISO/IEC 27001:2022 and ISO 9001:2015, we are committed to delivering professionalism and standardization in every project. With strong capabilities and an experienced team, Apollo Technologies provides comprehensive solutions including:

- IT Infrastructure
- Security Solutions
- Communication Systems
- AV Systems
- Mechanical and Electrical (M&E) Systems
- IoT Solutions
- Software Solutions

Customer satisfaction is our measure of success. We are committed to long-term partnership and delivering optimal value.

Sincerely.

IT INFRASTRUCTURE & SECURITY

Server & Storage systems

Solutions from leading global vendors, providing computing power and centralized data storage space, enabling secure information management and efficient retrieval.

Networking systems

Building a stable, high-speed, and secure connectivity platform, ensuring smooth data flow throughout the organization.

Server room

Establishing a standard technical space with optimal cooling, power supply, raised flooring, and physical security to protect core equipment.

Structured Cabling System

Designing a scientific, standardized, and synchronized cabling system, creating flexibility for expansion and maintenance of the connectivity infrastructure..

SECURITY SOLUTIONS

CCTV/VMS System

Provides high-quality visual observation and data storage, advanced AI features, and diverse integrations to suit all customer needs and scales.

Access Control System

Establishing a modern security standard, ensuring tight access management while maintaining convenience, reliability, and the highest level of privacy for businesses.

Video Door Phone

Elevates the convenience experience with a flexible solution that meets needs, intelligently identifies visitors, and allows for secure and professional remote connection and reception.

Guard Tour and Help Point

Optimizes security team performance and provides a network for immediate response, ensuring all incidents are handled quickly and transparently.

Smart Parking

Vehicle management with automation technology, providing speed, transparency, and a modern user experience.

Public Addressing

A versatile communication solution that provides comprehensive information connectivity, supports timely emergency coordination, and ensures maximum safety in all situations.

AUDIO VISUAL

Auditorium Sound

Establishing a dedicated sound distribution system integrating digital signal processing and high-performance amplifiers, ensuring consistent frequency response and standard sound pressure (SPL) for the entire auditorium space..

LED Screens

Providing a diverse range of display systems from indoor to outdoor, ensuring reliable operation under all environmental conditions. In addition, the solution supports specialized design structures such as customizable curved LEDs and

5D/Naked-eye 3D LED technology, optimizing depth of field effects and creating an impressive multi-dimensional spatial experience.

Smart integration solutions

Elevating the space's sophistication with sharp image quality and intelligent interactive solutions, bringing professionalism and modernity to every project.

Smart and integrated space solutions

Vehicle management with automation technology, bringing speed, transparency and a modern user experience.

COMMUNICATION

Telephone Exchange (PBX/IP-PBX)

Intelligent internal connectivity solution, optimizing costs and centralized call management.

Mobile Coverage (IBS/BTS)

Ensures continuous and stable mobile signal in areas with weak signal or high-rise buildings.

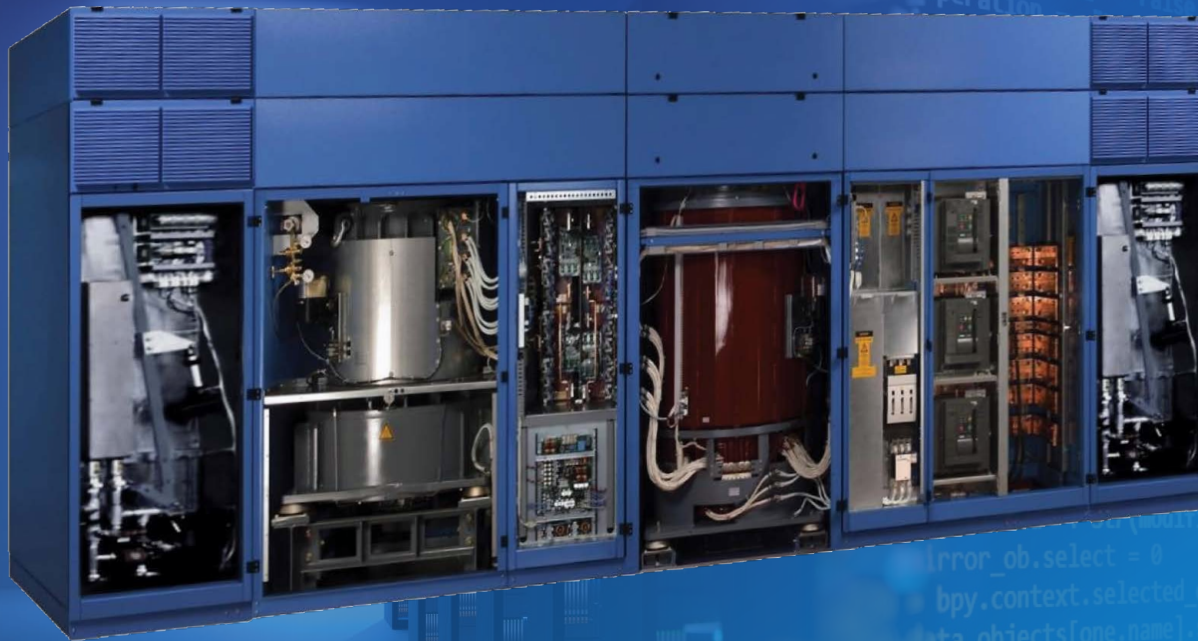

Network & Television Infrastructure (Teldata)

High-speed fiber optic cable system (GPON/XGS-PON), integrating multiple services: Internet, TV, and data on a single platform.

Walkie - Talkie

Instant, flexible communication solution meeting operational and security needs in all conditions.

M&E SYSTEMS

UPS & Generators, Electrical Panels

Continuous and backup power solutions ensure uninterrupted operation for critical systems. Apollo designs and implements integrated UPS, generators, medium and low-voltage electrical panels, meeting safety, stability, and future scalability requirements.

HVAC systems

Designing optimal air conditioning and ventilation systems for each space, ensuring air quality, effective temperature and humidity control, and energy savings. Suitable solutions for offices, data centers, hospitals, hotels, and large-scale projects.

Elevators

Providing and integrating modern elevator solutions that operate smoothly, safely, and optimize traffic flow. The system is selected to match the building's architecture, ensuring aesthetics, durability, and intelligent management.

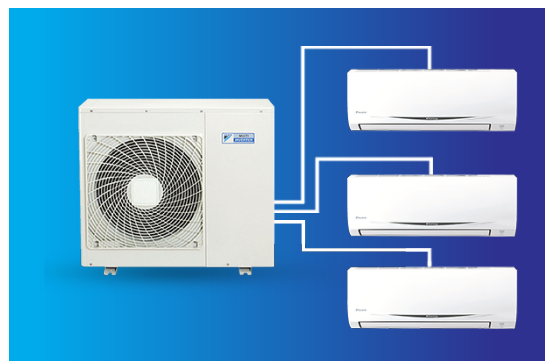

AIR CONDITIONING

Providing air
conditioning solutions.

LG Multi V central air conditioning systems possess many modern features to best meet customer needs and are easy to install.

Including: Multi V5, Multi V S, Multi V Water IV central air conditioners.

Daikin is the world's leading manufacturer of air conditioners, and our products are sold in over 140 countries. Since the early 1930s, we have made significant strides in realizing a better environment and quality of life through providing air conditioning solutions.

This is a precision air conditioning line, designed and developed for Internet providers, data centers, telecommunications equipment rooms, or environmental processing centers where equipment with high heat loads is used...

- Operates continuously 24 hours a day, 365 days a year.
- Precisely controls ambient temperature and humidity.
- High efficiency.
- High airflow control.
- High-standard air filters.

SAMSUNG

Samsung's WindFree™ breakthrough technology ASHRAE (American Society of Refrigeration, Heating and Air Conditioning Engineers) defines “comfortable airflow” as air at a speed below 0.15 m/s and without the presence of drafts.

HYUNDAI ELEVATORS

Apollo Technologies is the distributor, consultant, and implementer of Hyundai elevator solutions in Vietnam, providing high-quality elevators from the leading Korean brand. With advanced technology, stringent safety standards, and modern design, Hyundai elevators meet diverse needs, from residential and office buildings to large-scale projects..

TYPES OF HYUNDAI ELEVATORS

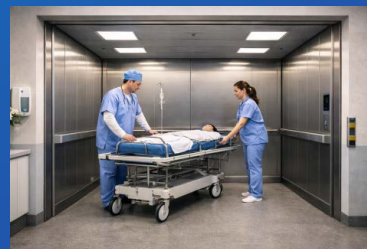

Home elevators

Glass elevators

Passenger elevators

Hospital elevators

Car elevators

Food elevators

SOUND & LIGHTING SOLUTIONS

Providing the most authentic solutions and experiences through sound and lighting.

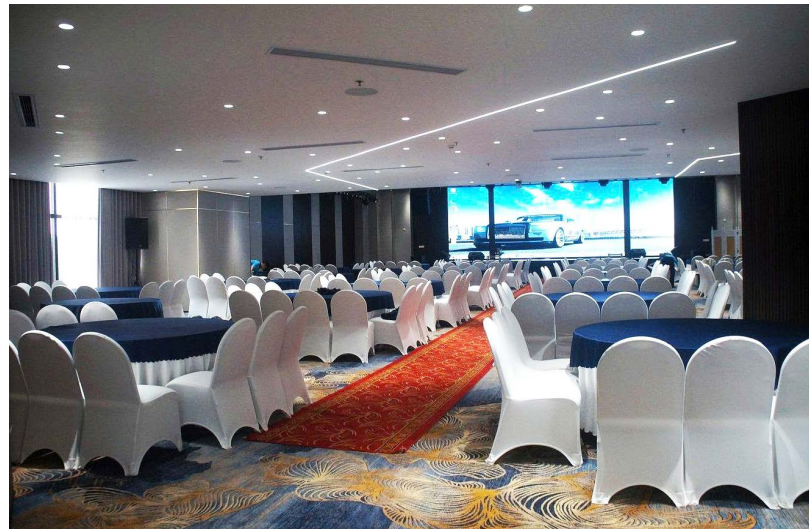

Apollo Technologies provides the most authentic solutions and experiences in the fields of sound and lighting. With innovation and professionalism, we are confident in helping you create a sophisticated living and working space.

Sound - Harmonious and Vibrant:

- Modern and diverse sound solutions.
- Top-of-the-line speaker and amplifier systems.
- Spatial sound design and conference room quality.

Lighting - Enhancing Beauty and Performance:

- Smart and energy-efficient lighting systems.
- Modern and diverse LED lighting for any space.
- Innovative lighting solutions for stages and interiors.

Professional and Dedicated Service:

- In-depth consultation and unique project planning.
- Project design and implementation tailored to your requirements.
- Ongoing maintenance and technical support.

IOT SOLUTION

Apollo Smart Control is a smart substation control system researched and developed by Apollo Technologies Joint Stock Company, including the following main functions:

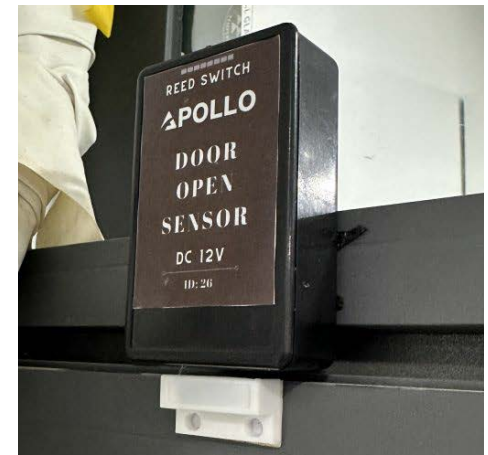

1. Monitoring and alerting substation parameters:

Temperature, humidity, dust, door open/close status, power supply parameters, flood detection, smoke detection...

2. Control: Automatic control of air conditioner and exhaust fan operation.

3. Methods:

- Monitoring and receiving alerts at the substation via warning screen and warning lights and sirens.
- Remote monitoring and receiving alerts via web and mobile app.

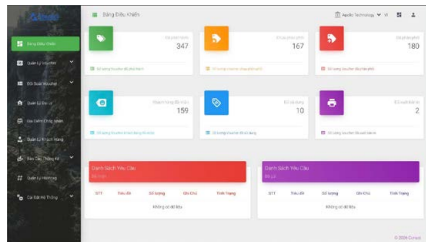

SOFTWARE SOLUTIONS

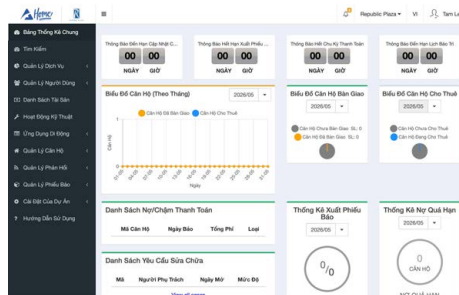

AVoucher Software Solution

A smart solution for managing and issuing electronic vouchers. It helps businesses optimize promotional campaigns, increase customer conversion rates, and manage marketing budgets precisely and effectively on a digital platform.

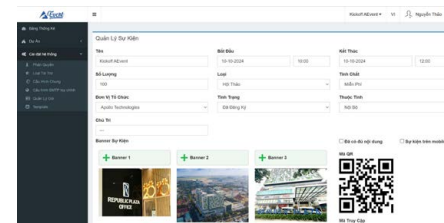

AHome Software Solution

AHome is a comprehensive residential management platform that connects the management board and residents, automating fee collection, feedback handling, and internal amenities management, delivering a modern and convenient living experience.

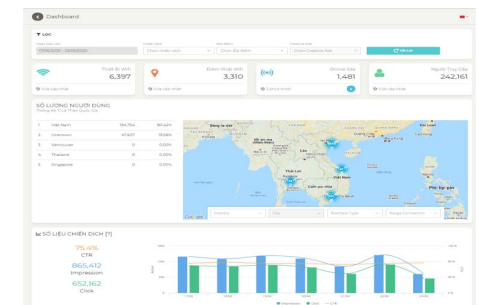

AEvent Software Solution

A professional event management system from planning to execution. It supports online registration, quick QR code check-in, and real-time data reporting, helping organizers effectively control events and create a positive impression on attendees.

AConnect Software Solution

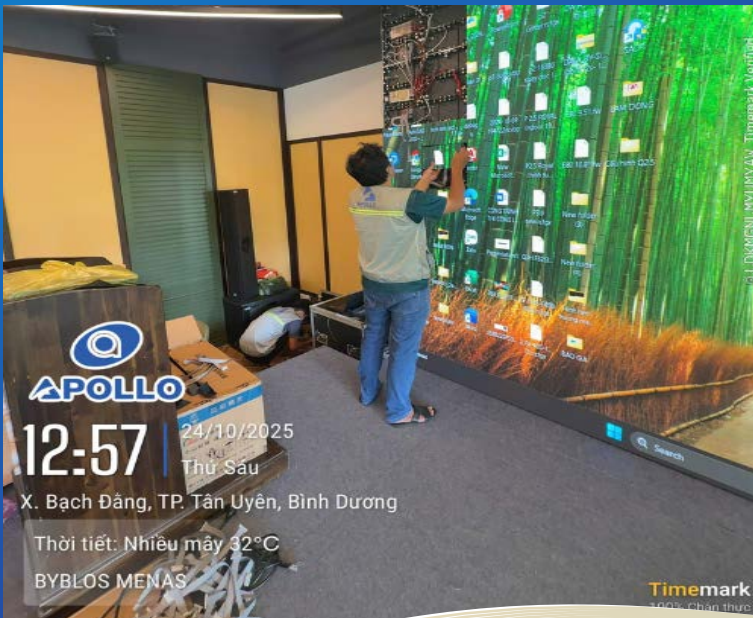

AConnect is a comprehensive Wifi marketing solution that utilizes existing Wifi infrastructure to reach and interact with customers. The system allows businesses to quickly deploy advertising campaigns, and integrated tools help track engagement metrics and monitor effectiveness visually.

DESIGN CONSULTING

Apollo provides comprehensive technical solution consulting and design services, helping clients build systems that meet their actual needs, technical standards, and long-term development goals.

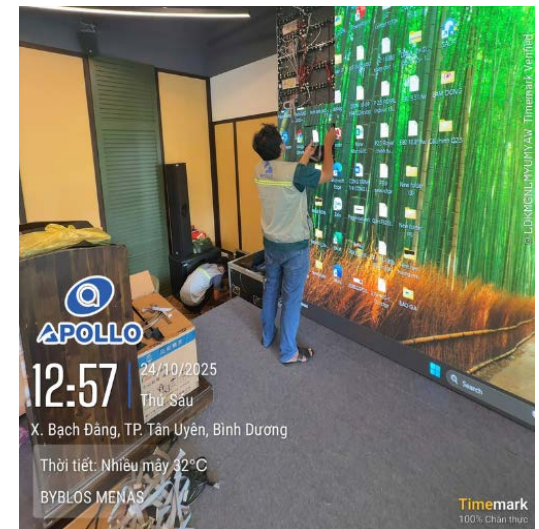

- Current situation survey and usage requirements analysis.
- Consulting on optimal and integrated system architecture.
- Proposing suitable technical solutions and investment options.
- Compliance with current technical standards and regulations.

DEPLOYMENT

Apollo implements the implementation and installation of the system in accordance with the design documents, ensuring progress, quality, and safety throughout the project execution.

- Installation of integrated technical systems.
- Configuration of equipment, software, and system integration.
- Testing, commissioning, and acceptance according to standards.
- Close coordination with the investor and relevant parties.

MAINTENANCE

Apollo's maintenance services help systems operate stably, minimize malfunctions, and extend equipment lifespan throughout their use.

- Scheduled periodic maintenance.
- System performance inspection, evaluation, and optimization.
- Prompt troubleshooting support.
- Upgrade and expansion consultation as needed.

COMMERCIAL SERVICES

Apollo provides equipment, solutions, and technical services from reputable brands, meeting all requirements regarding quality, origin, and warranty policies.

- Supply of genuine equipment.
- Consulting on selecting solutions to suit needs.
- Clear warranty and after-sales service policies.
- Technical support throughout the usage period.

INVESTMENT

Apollo participates in investment and collaborative development of technology, infrastructure, and digital solutions projects, aiming for sustainable value and long-term efficiency for stakeholders.

- Collaborative investment in technology and engineering projects.
- Development of new solutions and business models.
- Partnering throughout the project lifecycle.
- Optimizing efficiency and long-term value.

III. AREAS OF ACTIVITY

INVESTMENT AND DEVELOPMENT PARTNERSHIP TELECOMMUNICATIONS SYSTEM OUTDOOR MOBILE BASE SYSTEM AND IN-BUILDING MOBILE COVERAGE SYSTEM (IBS)

Environmentally friendly shared outdoor mobile station.

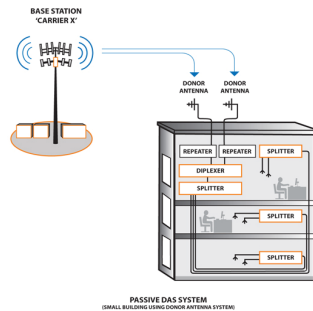

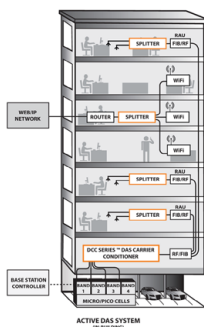

Artificial coconut tree antenna pole

Artificial palm tree antenna pole

Artificial pine tree antenna pole

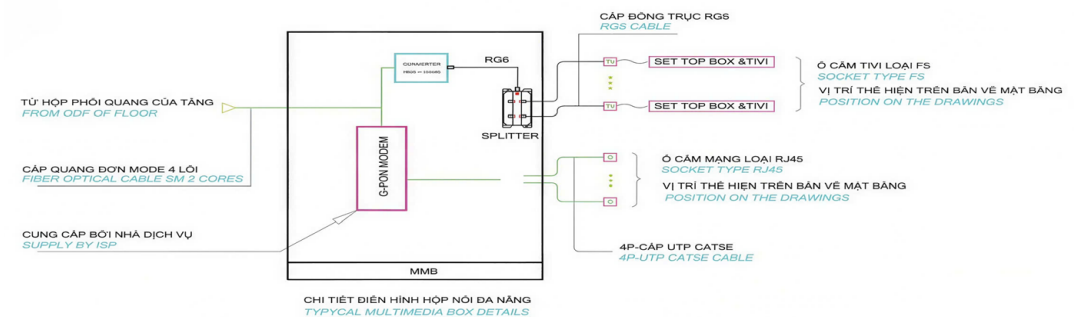

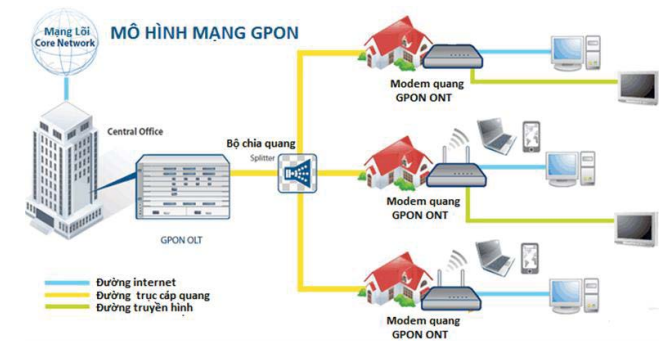

Antenna pole with integrated lighting

Mobile phone signal coverage system in high-rise buildings.

TEL-DATA SYSTEM SOLUTION

- Fiber optic infrastructure to each apartment (FTTH).
- Internal apartment infrastructure depends on usage needs.
- 2-4 core fiber optic cable to each apartment allows for the use of multiple services from multiple providers simultaneously, and provides redundancy.
- The connection system is ready to provide the fastest service when customers request it.
- No monopoly on telecommunications service providers.

KEY PRODUCTS

- Generators
- Marine Generator
- Hydro generators

Generators with power output from 5kVA to 3000kVA

5 - 15kW

200 - 650 kVA

2112 kVA

Vietgen hydroelectric generators from 8kVA to 375 kVA

Vietgen

375 kVA

Vietgen

60 kVA

Vietgen

8 kVA

Marine engines from 40 HP to 825 HP

FPT

825 / 600 / HP

FNM

250 / 145 / __HP

FPT

230 / 115 / __HP

The generators at Dzi An Electromechanical Plant are integrated with lithium starter batteries from the Vibat brand, increasing the stability and lifespan of the product.

IV. PRODUCTS

KEY PRODUCTS

- ATS systems
- Synchronizing panels
- Starter Batteries (VIBAT)

ATS power range
from 13.5kVA to 2112kVA

13.5kVA

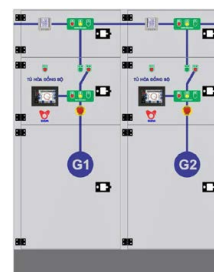

660kVA

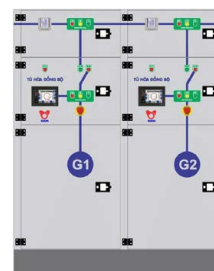

2112kVA

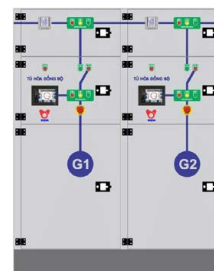

Synchronous switchgear with power
ratings from 435kVA to 2640kVA

435kVA

1320kVA

2640kVA

Starter Batteries
(VIBAT)

Battery for golf cart BS202

Rolling Door Battery BS2002

Go-kart racing battery BS501

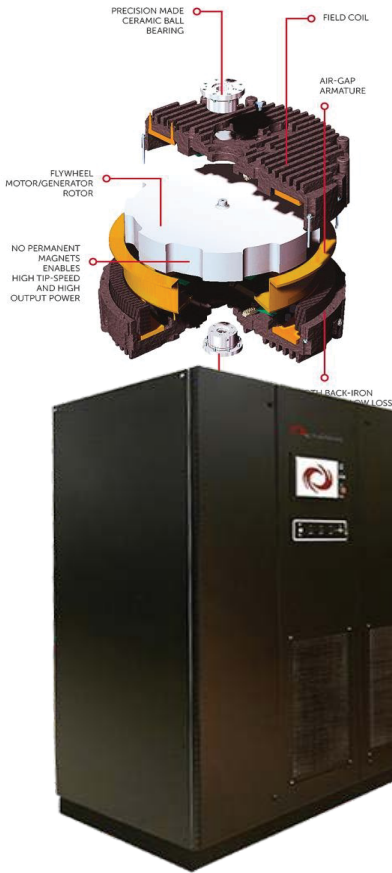

The generators at Dzi An Electromechanical Plant are integrated with lithium starter batteries from the Vibat brand, increasing the stability and lifespan of the product.

KEY PRODUCTS

- UPS systems
- Telecom stations

ACTIVE POWER FLYWHEEL UPS

Made in the USA
UPS Capacity: 300kW
Flywheel: 6MJ Modules: 8 modules

PILLER UBT+ ROTARY UPS

Made in Germany
UPS Power: 560 - 2000kW
Flywheel: 16 - 60MJ Modules: 8 modules

TELECOM STATIONS

DZM

Model: DTS 8821
Size: 80x80x210cm
Battery compartment size: 76cm
Equipment compartment size: 22U
Air conditioner capacity: 9000 BTUh

DZM

Model: DTS 8814
Size: 80x80x135cm
Battery compartment size: 36cm
Equipment compartment size: 15U
Air conditioner capacity: 6000 BTUh

DZM

Model: DTS 1126
Size: 110x100x260cm
Battery compartment size: 0cm
Equipment compartment size: 44U
Air conditioner capacity: 9000 BTUh
